

CRICUT, INC. CONFLICT MINERALS POLICY STATEMENT

May 29, 2024

In response to violence and human rights violations in the mining of certain minerals from the Democratic Republic of the Congo (“DRC”) or adjoining countries, the U.S. Securities and Exchange Commission adopted rules to implement reporting and disclosure requirements related to “conflict minerals,” as directed by Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (“Section 1502”).

Cricut, Inc. (“Cricut”) is subject to Section 1502, which defines Conflict Minerals as cassiterite (tin), coltan (tantalum), wolframite (tungsten) and gold (or derivatives of these minerals), or any other mineral or its derivatives determined to be financing conflict in the DRC or an adjoining country.

As a manufacturer of products that contain Conflict Minerals, we are committed to avoiding minerals that originate or support conflict or high-risk areas. We support the goals of Section 1502, which requires public companies like Cricut to conduct supply chain due diligence regarding Conflict Minerals that are necessary to the functionality or production of a product manufactured or contracted for manufacture and that originate in the DRC or adjoining countries. We support responsible sourcing of Conflict Minerals from the DRC and adjoining countries in accordance with the Organisation for Economic Co-operation and Development’s Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas and the supplements thereto (“OECD Guidance”).

We expect our suppliers to source Conflict Minerals from smelters and refiners that have completed an industry standard independent third-party Conflict Minerals audit and require that such suppliers have policies in place to conduct responsible Conflict Minerals sourcing within their own supply chains that conform to the OECD Guidance. We require that in-scope suppliers (those for whom Conflict Minerals are necessary to the functionality or production of a product that we sell) annually provide to Cricut, in a timely manner following any request, a complete, accurate and current Responsible Minerals Initiative Conflict Minerals Reporting Template.

We will continue to monitor global developments and the emergence of additional requirements or standards related to the sourcing of minerals or other materials from the DRC and adjoining countries or other regions to continually improve our Conflict Minerals program.
